beldam koton BH and koton BS packings

beldam koton BH and **koton BS packings** are plaited packings manufactured from long staple cotton yarns which are thoroughly impregnated with a high grade lubricant and treated with graphite. Due to their construction these packings are flexible and resilient in use, thereby, reducing shaft wear to a minimum.

beldam koton BH packing is a hard plaited graphited packing.

beldam koton BS packing is a softer version.

The construction employed and the lubricant contained in both **beldam koton BH** and **koton BS packings** make them admirably suited to water, but can also be used for oils, alcohol, ammonia and weak alkali applications, particularly in refrigeration plants. They are eminently suitable for very high speed centrifugal pumps.

Max. Temp	Max. Pressure	pH range	Max. Shaft Speed
140°C	50 bar	5 - 9	7 m/s

Sizes	3 mm	to	10 mm	15 m per box
	11 mm	to	25 mm	7.5 m per box
	over 25 mm			18m canvas bagged

beldam koton BH and **koton BS packings** are also supplied in die-formed rings
