beldam koton WH and koton WS packings

beldam koton WH and koton WS packings have been specially developed for use with high speed rotary spindles. They are manufactured from long staple cotton yarns into a solidly plaited square section packing. During manufacture the yarns are thoroughly impregnated with first grade tallow.

The natural content of wax in the cotton fibres ensures a most suitable packing for high rubbing speeds. The pliable nature of the material used means free motion of the rod and negligible wear.

beldam koton WH packings is a hard plaited packing
beldam koton WS packings is a softer version.

beldam koton WH and koton WS packings are packings particularly suited to dry conditions as found in air pumps. Also recommended for use on reciprocating and rotary pumps, compressors, refrigerating machinery and valve spindles.

Max. Temp.
140°C

Max. Pressure
50 bar

pH Range
5 - 9

Max. Shaft Speed
7 m/s

Sizes

3 mm to 10 mm
11 mm to 25 mm
over 25 mm

15 m per box
7.5 m per box
18 m canvas bags

beldam koton WH and koton WS packings are also supplied in die-formed rings.
