beldam lascaroilite strip

This is a new and most useful development of our well-established **beldam lascaroilite jointing**, offering significant cost reductions for many applications. **beldam lascaroilite strip** avoids material waste and saves labour.

Many gaskets, for example, for crankcase doors, can be made from our strip with butt, skived or dovetail joins. This provides an excellent seal without any material waste, which would be inevitable if cut from solid sheet, as was the common practice in the past. Gaskets are made easily on site or supplied from our gasket cutting department.

Beldam lascaroilite strip is particularly valuable for shipbuilding and ship repairing. It is also used as a general purpose sealing strip in automotive, aircraft and electrical industries.

Beldam lascaroilite strip is recommended for low internal pressure and where the surfaces to be sealed are rough or uneven. Seals against oils, solvents, many acids, alkalis and is impermeable to gases and water.

Beldam lascaroilite strip is manufactured from high grade cork under pressure, with a base oil resistant rubber compound. The result is a light weight sealing strip with the resilience of cork yet avoids its adverse physical properties.

Max. Temp	120°C	Max. Pressure	40 bar
-----------	-------	---------------	--------

Thickness	mm	0.75	1.0	1.5	2.0	2.5	3.0	4.5	6.0	6.5
-----------	----	------	-----	-----	-----	-----	-----	-----	-----	-----

Widths from	12.5 mm	to	100 mm (wider where manufacturing quantities justify)
-------------	---------	----	---

Can also be supplied in cut joints, packing and sheets.
